“Khidmat, with 2,455 reviews (more than double yours), dominates local “near me” searches despite a slightly lower rating. Google’s algorithm weighs review volume heavily for local rankings. Combined with

your **0% response rate**, the algorithm sees low engagement — pushing your listing below competitors who actively respond to their customers.

1★	<i>"I ordered food directly from the restaurant, as the restaurant insisted of ordering Directly rather than through zomato or Swiggy. I did not get the food delivered for even 2 hours from the ordering time. Then I received a call saying, they misplaced my order, and don't know my address. Very disappointing and unprofessional."</i> — Gunjan Agrawal	NO REPLY a week ago
1★	<i>"I am writing this review with heart full of disappointment and awful experience which recently happened with us. We are a very old customer whose menu is also fixed most of the time. So, we have pre booked this restaurant for my son's birthday..."</i> — SanditaP	NO REPLY 5 months ago
